

University of Limerick – UL@Work

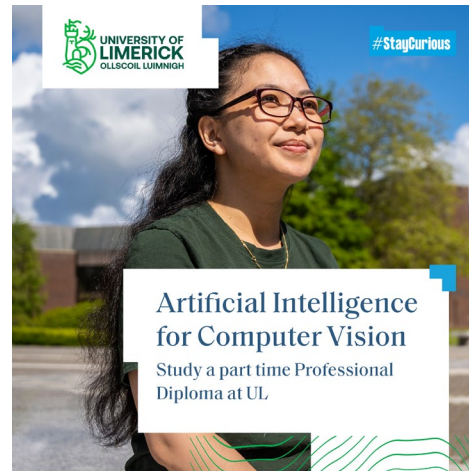

Dr Sinéad Burke – Project Manager

Context

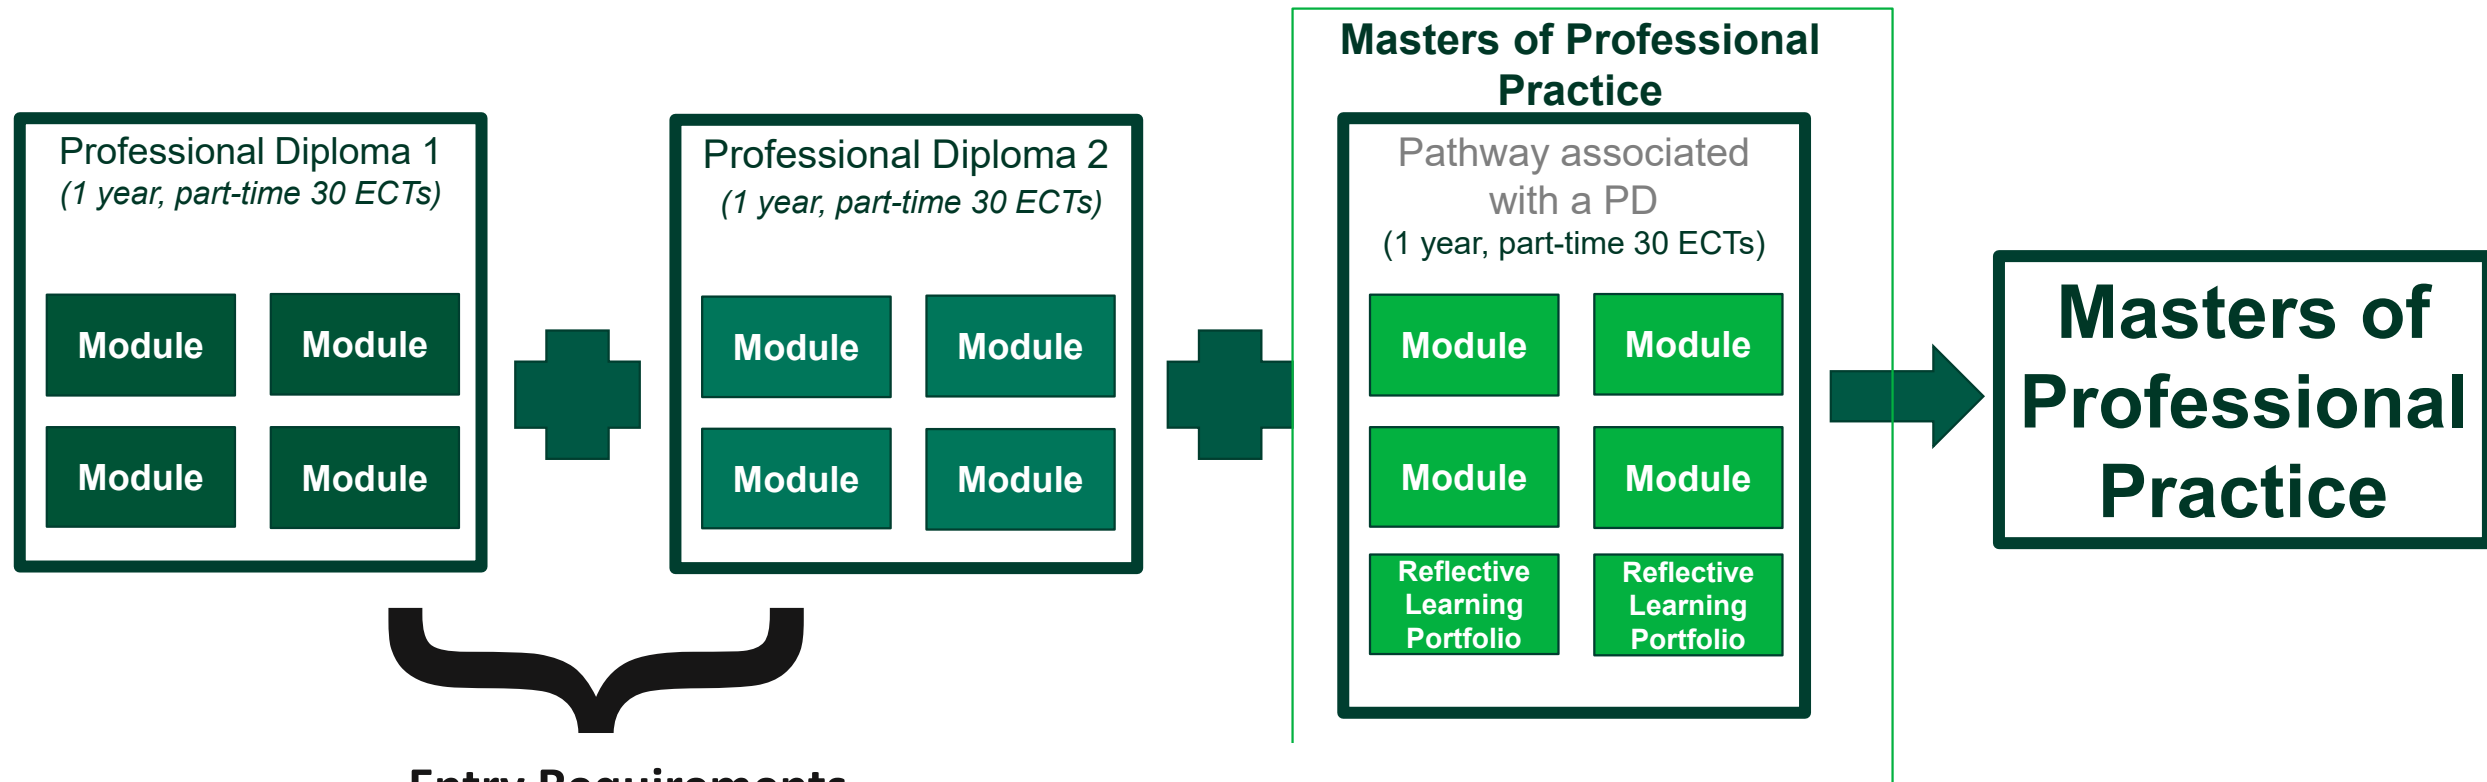

Selection of Professional Diplomas

All Level 9 Professional Diplomas contain two modules (20%) on Transversal Future Focused thinking designed to embed a futures outlook and enhance Cross-Disciplinary collaboration

Stackable Masters – Masters of Professional Practice

Entry Requirements

2 PDs (2:1) to be completed within 5 years of Masters application

Core Reflective Learning Portfolio

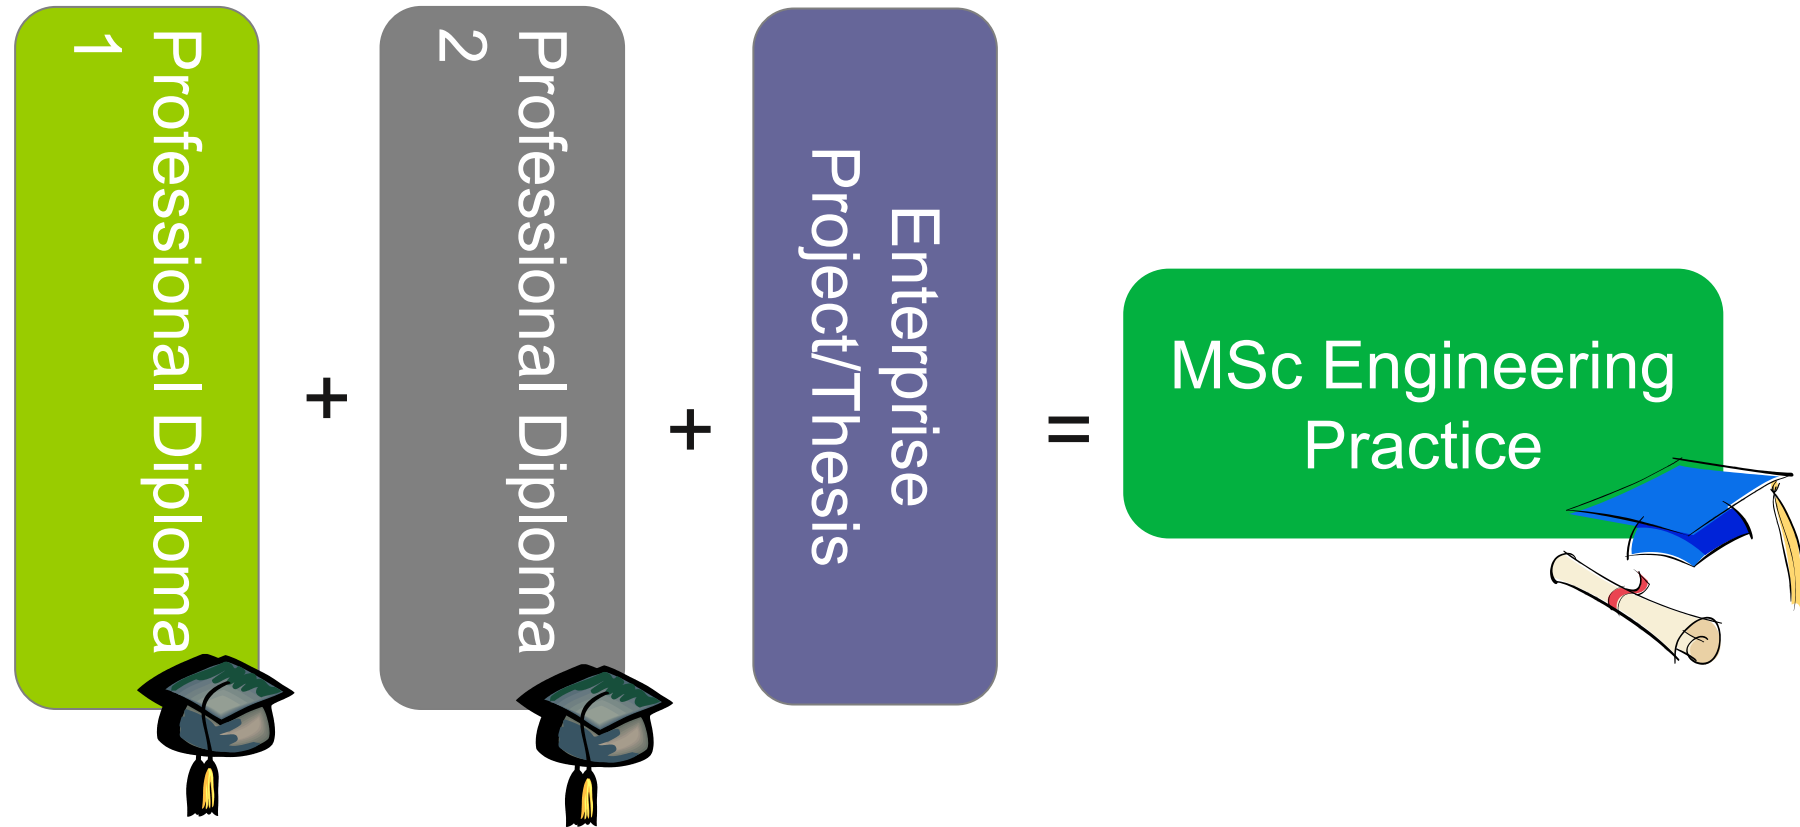

Capstone piece to capture the learning across three different diplomas in one place and allows the student to go to employers with something tangible to show with regard to what they have gained and how they have built the different elements together.

Market for Masters of Professional Practice trans-disciplinary stackable Masters for Professional learners

*Fantastic idea I would very much be in favour of participating in this
I think this is a great idea
This is good plan and would be a valuable masters qualification to have due to its broad nature as focused masters can restrict progress to other fields
I believe the combination of Level 9 Diploma 's into a [masters]-sic would be very beneficial.*

Existing MSc Engineering Practice

Thank You!!
