

Component Specification

Hand Held Pesticide Application

Level 5

5N0731

1. Introduction

The Further Education and Training Awards Council is the single national awarding body in further education and training in Ireland. It is responsible for determining the standards for named awards at levels 1 to 6 on the National Framework of Qualifications. All named awards are devised in line with the National Qualifications Authority of Ireland's determinations and guidelines.

2. The National Framework of Qualifications

The National Framework of Qualifications comprises 10 levels ranging from initial learning (level 1) to the most advanced levels of learning (level 10).

At each level there are one or more award types. An award type is a grouping of awards that share similar features. The National Qualifications Authority of Ireland has determined Award Type Descriptors for each award type. See www.nqai.ie. The Award Type Descriptor identifies the key strands and sub-strands of knowledge, skill and competence for that award type.

3. Guide to Level

Learning outcomes at this level include a broad range of skills that require some theoretical understanding. The outcomes may relate to engaging in a specific activity, with the capacity to use the instruments and techniques relating to an occupation. They are associated with work being undertaken independently, subject to general direction.

Strand	Sub-strand	Nature of learning
Knowledge	Breadth	Broad range of knowledge
	Kind	Some theoretical concepts and abstract thinking, with significant depth in some areas. Some underpinning theory
Know How & Skill	Range	Demonstrate a broad range of specialised skills and tools
	Selectivity	Evaluate and use information to plan and develop investigative strategies and to determine solutions to varied unfamiliar problems
Competence	Context	Act in a range of varied and specific contexts, taking responsibility for the nature and quality of outputs; identify and apply skill and knowledge to a wide variety of contexts
	Role	Exercise some initiative and independence in carrying out defined activities; join and function within multiple, complex and heterogeneous groups
	Learning to Learn	Learn to take responsibility for own learning within a managed environment
	Insight	Assume full responsibility for consistency of self- understanding and behaviour

Extract from 'Determinations for the Outline National Framework of Qualifications': NQAI (www.nqai.ie)

4. Award Specifications

FETAC determines the standards for all awards in partnership with relevant stakeholders. This award was developed in line with the Council policy on Standards Development published in September 2005.

Standards are published in the form of Award Specifications. A Specification is devised in respect of each named award. Each Specification provides a comprehensive description of the features, characteristics and standards of the award.

A **Certificate Specification** is published for each named **major award**.

A **Component Specification** is published for each named **minor award**. Please note that each component (i.e. minor award) is associated with one or more Certificates (i.e. major, special purpose or supplemental award). See www.fetac.ie.

A **Specific Purpose Specification** is published for each **special purpose award**.

A **Supplemental Specification** is published for each **supplemental award**.

Standards are expressed in terms of **learning outcomes** i.e. concise statements of what the learner is expected to know or be able to do in order to achieve that award.

Learning outcomes for all awards (i.e. major, special purpose, supplemental awards) are contained within the associated Component Specifications.

5. Component Details

Title	Hand Held Pesticide Application
Teideal as Gaeilge	Feidhmiú Lotnaidicídí Láimhe
Award Type	Minor
Code	5N0731
Level	5
Credit Value	5
Purpose	The purpose of this award is to equip the learner with the knowledge, skill and competence to apply crop pesticides using a hand held applicator in accordance with recommended safe practice.
Learning Outcomes	<p>Learners will be able to:</p> <ol style="list-style-type: none">1 Describe how infestations of pests (weeds, diseases, insects and vertebrates) affect crop growth and reduce quality2 Describe the range of pest control methods available to farmers and growers3 Explain the terminology used to categorise pesticides for crop production, the factors affecting pesticide efficiency and the factors to be considered when selecting a formulation4 Describe principles and procedures for the safe handling, storage, application and disposal of pesticides including appropriate personal protective equipment5 Summarise laws and regulations relating to poisonous substances to include pesticide residues and maintenance of adequate records6 Explain the principles of application technology necessary for the proper application of pesticides in respect of applicator components, calibration, maintenance, field operating procedures and precautions7 Interpret pesticide label information including precautionary symbols, product name, class designation, registration number, purpose, precautions, first aid instruction, toxicology information, disposal, notice to user, material safety data sheets (MSDS) and directions for use8 Prepare a hand-held applicator for work, including calibration, in accordance with good practice and manufacturers instructions

- 9 Make up a pesticide spray mix in accordance with good practice including the pesticide product label dosage recommendations and the application area
- 10 Store a hand held applicator and personal protective equipment in a safe and efficient manner according to manufacturers instructions
- 11 Apply a pesticide mix with a hand-held applicator in a safe and efficient manner in accordance with recommended good practice

Assessment

General Information

Details of FETAC's assessment requirements are set out in [Assessment Guidelines for Providers](#).

All FETAC assessment is criterion referenced. Successful achievement of the award is based on learners attaining the required standards of knowledge, skill or competence.

The techniques set out below are considered the optimum approach to assessment for this component. In exceptional circumstances providers may identify alternative assessment techniques through the provider's application for programme validation which are **reliable** and **valid** but which are more appropriate to their context.

Assessment of a number of components may be integrated across programmes for delivery, provided that the learning outcomes of each minor award are assessed.

Group or team work may form part of the assessment, provided each learner's achievement is separately assessed.

All providers are required to submit an assessment plan as part of their application for programme validation. Assessment Plans will include information relating to scheduling and integration of assessment. [See FETAC's Provider Guidelines for Programme Validation](#).

Assessment Techniques

In order to demonstrate that they have reached the standards of knowledge, skill and competence identified in all the learning outcomes, learners are required to complete the assessment(s) below.

The assessor is responsible for devising assessment instruments (e.g. project and assignment briefs, examination papers), assessment criteria and mark sheets, consistent with the techniques identified below and FETAC's assessment requirements.

Programme validation will require providers to map each learning outcome to its associated assessment technique. [See FETAC's Provider Guidelines for Programme Validation](#).

All learning outcomes **must** be assessed.

Skills Demonstration 60%

Examination - Theory 40%

Description

Skills Demonstration

A skills demonstration is used to assess a wide range of practical based learning outcomes including practical skills and knowledge. A skills demonstration will require the learner to complete a task or series of tasks that demonstrate a range of skills.

The assessor will devise a skills demonstration based on learning outcomes 7-11. The learner must complete the 20 tasks set out in the list below.

Weighting Factor:

Where a critical fault occurs the entire skills demonstration must be terminated.

0 marks for termination of skill demonstration due to a critical fault or failure to complete the task.

1 mark for completing the task with 3 or more minor faults

2 marks for completing the task with less than 3 minor faults

3 marks for exceeding the criteria for the task with no minor faults

Examples of critical faults: compromises safety, animal welfare, the environment, makes a pesticide mix that does not conform with label information

Examples of minor faults: Incorrect sequence, too slow, requires guidance

The learner must achieve at least 40 of the 60 marks available, to pass this assessment. The learner must pass this assessment to achieve the award

List of tasks:

Preparing hand held applicator for work

1. Carries out risk assessment for spraying
2. Selects and wears appropriate personal protective equipment
3. Selects applicator appropriate to work requirements/situations
4. Identifies components and their function
5. Checks applicator and identifies damaged components
6. Selects nozzle type appropriate to spraying task & sets pressure valve
7. Calibrates sprayer (with access to worksheet)

Making up a pesticide spray mix

8. Interprets pesticide label information for approved uses, risk and safety information and directions for use
9. Calculates area to be treated and volume of mix required
10. Interprets pesticide label to determine product dose rate and volume to add to tank
11. Measures and adds the correct dose and mixes
12. Returns pesticide product and completes Chemical Store Stock Record
13. Disposes of empty pesticide containers in a safe manner

Applying pesticide with a hand-held applicator

14. Checks wind speed and direction
15. Fits sprayer as high as possible on the back with aid of a high stand
16. Applies pesticide mix by working downwind, at right angles, in parallel matched swaths, walking at pace used during calibration, keeping lance steady, at the correct height

17. Completes the Sprayer Operators Log

Preparing applicator and personal protective equipment for storage

18. Decontaminates applicator and prepares for storage

19. Decontaminates and stores personal protective equipment

20. Washes hands and exposed skin

Overall Marks: 60

Examination - Theory

An examination provides a means of assessing a learner's ability to recall and apply knowledge, skills and understanding within a set period of time and under clearly specified conditions.

A theory-based examination assesses the ability to recall, apply and understand specific theory and knowledge.

The assessor will devise a theory-based examination to assess learning outcomes 1 - 6.

Overall Marks 40

Recognition of Prior Learning (RPL)

Learners may be assessed on the basis of their prior knowledge and experience. Providers must be specifically quality assured to assess learners by this means. To do so they must complete B10, see Provider's Quality Assurance Guidelines and be included on the Register of RPL approved providers. See RPL Guidelines at www.fetac.ie for further information and registration details.

Grading

Pass	50% - 64%
Merit	65% - 79%
Distinction	80% - 100%

Specific Validation Requirements

There are no specific validation requirements for this award

Supporting Documentation

None

Access

To access programmes leading to this award the learner should have reached the standards of knowledge, skill and competence associated with the preceding level of the National Framework of Qualifications. This may have been achieved through a formal qualification or through relevant life and work experience.

Transfer

Successful completion of this component award enables the learner to transfer to programmes leading to other certificates where this component is a mandatory or an elective requirement.
