Component Specification NFQ Level 6

Equitation Theory 6N3386

1. Component Details

Title
Equitation Theory

Teideal as Gaeilge
Teoiric Eachaíochta

Award Type
Minor

Code
6N3386

Level
6

Credit Value
15

Purpose
The purpose of this award is to equip the learner with the knowledge, skill and competence to apply equitation theory to preparation of a horse for competition.

Learning Outcomes
Learners will be able to:

1. Evaluate the effects of physical and mental fitness on rider and horse

2. Explain points of the training scale

3. Appraise the biomechanics of jumping including centre of gravity, anatomy and conformation and its effects, phases of the jump, jumping technique, psychology of the horse, bascule, and rhythm

4. Investigate the uses of gymnastic grid jumping

5. Explore competition options for young horses including shows, show jumping, dressage, eventing and hunting

6. Assess key aspects of a horses conformation relating to its paces including pace sequence, rhythm, tempo,
variation within paces and balance, transitions, and effects of changing direction

7 Assess the benefits of riding on the flat and showjumping on the horse performing cross country including confidence, balance, co-ordination, agility 'fifth leg', and rhythm

8 Assess the correct way of going in dressage including key points riders position, use of aids, halt and half halt, transitions, poll flexion, lateral bend, turn on forehand, leg yielding, shoulder in and shoulder fore, half pass, rein back and counter canter

9 Evaluate training procedures for jumping including lungeing over a fence, loose jumping, introducing the young horse to jumping, effects of distances on horses performance, potential problems during training, developing responsiveness, suppleness and balance over poles, developing athletic jumping, and competition jumping

10 Evaluate the links and benefits of flatwork on the jumping ability of the horse including balance, straightness, muscle development, self carriage, and confidence

11 Evaluate young horses for competition including fitness, passport, inoculations, loading and in company behaviour.

Assessment

General Information

All assessment should be planned in accordance with the programme assessment strategy developed as part of the programme submission for validation. See Policies and Criteria for Validation of Programmes. Assessment should be undertaken consistently and reflect current assessment guidelines. See www.qqi.ie.

All FET assessment is criterion referenced. Successful achievement of the award is based on learners attaining the required standards of knowledge, skill or competence consistent with the minimum intended programme learning outcomes.

The techniques set out below are considered the optimum approach to assessment for this component. In exceptional circumstances providers may identify alternative assessment techniques through the provider’s application for programme validation which are reliable and valid but which are more appropriate to their context.
Assessment of a number of components may be integrated across programmes for delivery, provided that the learning outcomes of each minor award are assessed.

Group or team work may form part of the assessment, provided each learner’s achievement is separately assessed.

All providers are required to submit an assessment plan as part of their application for programme validation. Assessment Plans will include information relating to scheduling and integration of assessment. See current FET validation guidelines at www.qqi.ie.

**Assessment Techniques**

In order to demonstrate that they have reached the standards of knowledge, skill and competence identified in all the learning outcomes, learners are required to complete the assessment(s) below.

The assessor is responsible for devising assessment instruments (e.g. project and assignment briefs, examination papers), assessment criteria and mark sheets, consistent with the techniques identified below and QQI’s assessment requirements.

Programme validation will require providers to map each learning outcome to its associated assessment technique. All learning outcomes must be assessed and achieved in accordance with the **minimum intended module learning outcomes** set out in the validated programme.

<tr>
<td>Skills Demonstration</td>
<td>60%</td>
</tr>
</tbody>
</table>

**Assignment**

An assignment is an exercise carried out in response to a brief with specific guidelines as to what should be included. An assignment is usually of short duration and may be carried out over a specified period of time.

The tutor will devise 2 assignments each with a weighting of 20%.

**Skills Demonstration**

A skills demonstration is used to assess a wide range of practical based learning outcomes including practical skills and knowledge. A
skills demonstration will require the learner to complete a task or series of tasks that demonstrate a range of skills.

Recognition of Prior Learning (RPL)

To support the development and implementation of RPL with regard to access, granting credit/exemptions and achievement of awards/parts of awards, providers should refer to QQI's Statutory Guidelines for Quality Assurance, the Policies and Criteria for Validation of Programmes and the Principles and Operational Guidelines for the Recognition of Prior Learning in Further and Higher Education and Training available at www.qqi.ie

</table>

Specific Validation Requirements

The provider must have all of the following in place to offer this award:
Access to a yard approved by the Association of Irish Riding Establishments (www.aire.ie) or Horse Racing Ireland (www.goracing.ie)

Supporting Documentation

None

Access

To access programmes leading to this award the learner should have reached the standards of knowledge, skill and competence associated with the preceding level of the National Framework of Qualifications. This may have been achieved through a formal qualification or through relevant life and work experience.

Transfer

Successful completion of this component award enables the learner to transfer to programmes leading to other certificates where this component is a mandatory or an elective requirement.

2. FET Award Standards

QQI award standards are determined within the National Framework of Qualifications (NFQ), http://www.nfq-qqi.com. QQI determines standards for the education and training awards that it makes itself and that are made by providers to whom it has delegated authority to make an award. Providers offering programmes leading to QQI awards must have their programme(s) validated in accordance with current validation policy (see www.qqi.ie).

Award standards are designed to be consistent with the NFQ's award classes i.e. major, special purpose, supplemental and minor awards. They are expressed in terms of learning outcomes i.e. concise statements of what the learner is expected to know or be able to do in order to achieve a particular award. Learning outcomes for FET awards are contained within the associated specifications:
Award standards are thresholds, they describe standards of knowledge, skill or competence to be acquired, and where appropriate, demonstrated, by a learner before an award may be made.

Award standards will be reviewed from time to time as necessary. Minor changes may be made by the QQI executive outside the review cycle where necessary. Changes to standards are published on QQI’s website. Providers with validated programmes and providers with delegated authority to make awards are responsible for monitoring relevant standards and making necessary responses to changes.

3. FET Credit

Every FET certificate and component specification includes an FET credit value (Table 1). FET credit is quantified in multiples of 5 FET credits (up to 50 hours of learner effort). Learner effort is based on the time taken by typical learners at the level of the award to achieve the learning outcomes for the award. It includes all learning time involved including: guided learning hours, self-directed learning and assessment.

Guide to Level

Learning outcomes at this level include a comprehensive range of skills which may be vocationally-specific and/or of a general supervisory nature, and require detailed theoretical understanding. The outcomes also provide for a particular focus on learning skills. The outcomes relate to working in a generally autonomous way to assume design and/or management and/or administrative responsibilities. Occupations at this level would include higher craft, junior technician and supervisor.
